

MATEMATICA I SECCIÓN: U7

CLASE N° 7

☐ Soluciones múltiples.

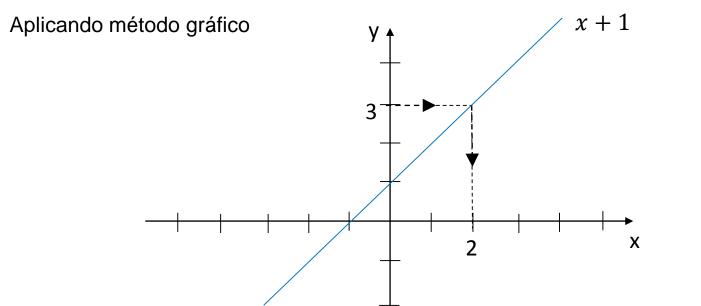

■ SOLUCIONES MÚLTIPLES.

Resolución de ecuaciones gráficamente

Resolver la ecuación x + 1 = 3

Solución:

Aplicando inversas se tiene: $x + 1 = 3 \implies x + 1 - 1 = 3 - 1 \implies x = 2$

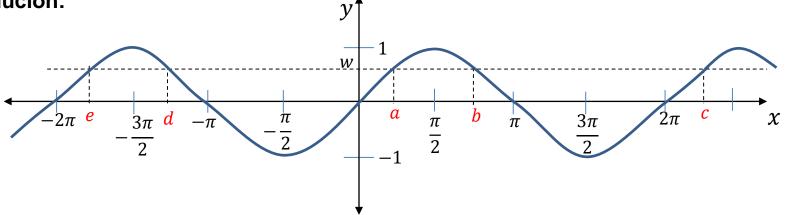

x = 2

■ SOLUCIONES MÚLTIPLES.

Resolver la ecuación Sen(x) = w

Solución:

$$a = arcsen(w)$$

$$b = \pi - arcsen(w)$$

$$c = 2\pi + arcsen(w)$$

$$d = -\pi - arcsen(w)$$

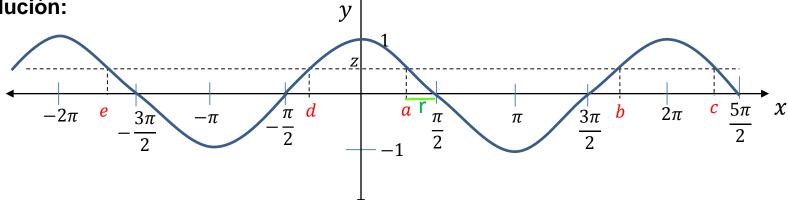

$$e = -2\pi + arcsen(w)$$

SOLUCIONES MÚLTIPLES.

Resolver la ecuación Cos(x) = z

$$a = \arccos(z) \quad r = \frac{\pi}{2} - \arccos(z)$$

$$b = \frac{3\pi}{2} + r \quad \Rightarrow \quad b = \frac{3\pi}{2} + \frac{\pi}{2} - \arccos(z) \quad \Rightarrow \quad b = 2\pi - \arccos(z)$$

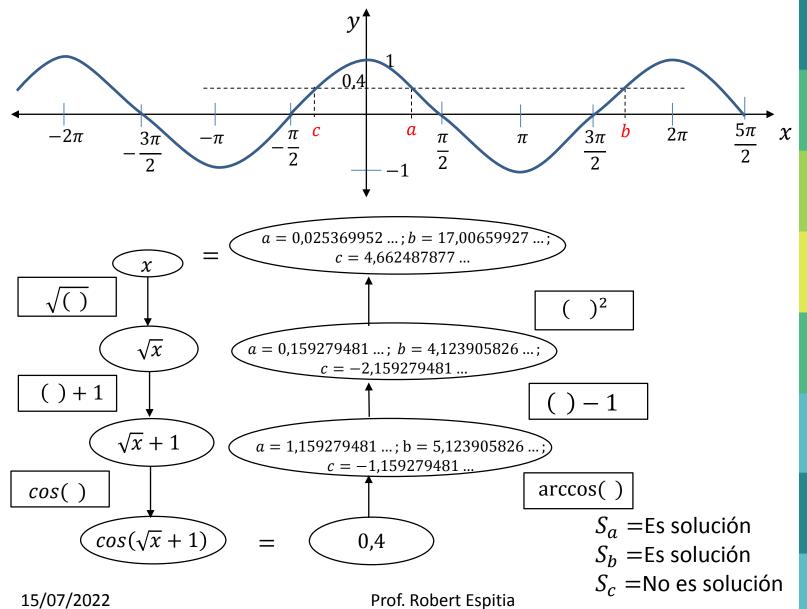

$$c = \frac{5\pi}{2} - r \quad \Rightarrow \quad c = \frac{5\pi}{2} - \frac{\pi}{2} + \arccos(z) \quad \Rightarrow \quad c = 2\pi + \arccos(z)$$

$$d = -\frac{\pi}{2} + r \quad \Rightarrow \quad d = -\frac{\pi}{2} + \frac{\pi}{2} - \arccos(z) \quad \Rightarrow \quad d = -\arccos(z)$$

$$e = -\frac{3\pi}{2} - r \quad \Rightarrow \quad e = -\frac{3\pi}{2} - \frac{\pi}{2} + \arccos(z) \quad \Rightarrow \quad e = -2\pi + \arccos(z)$$

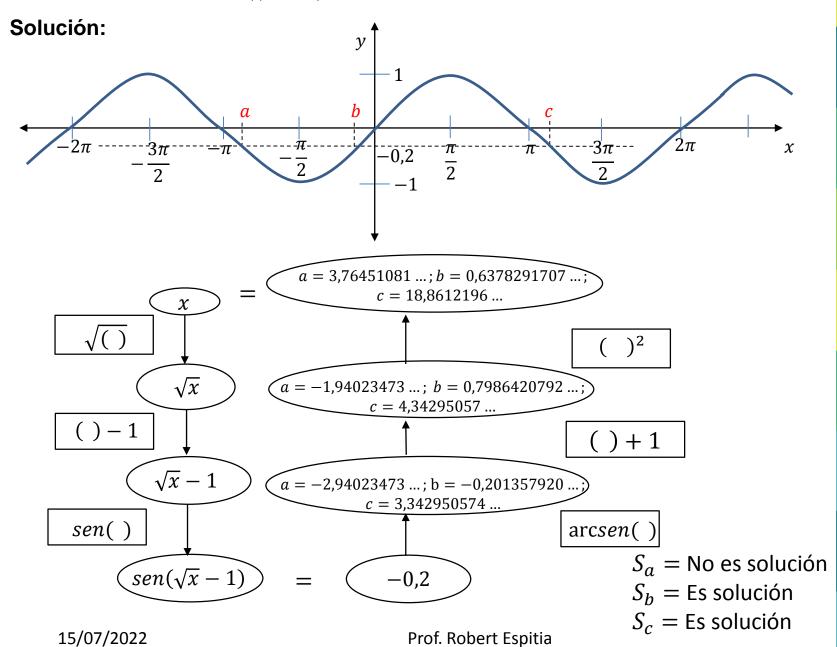

Resolver la ecuación $Cos(\sqrt{x} + 1) = 0.4$

Solución:

5

Resolver la ecuación $sen(\sqrt{x} - 1) = -0.2$

6
